

* Production Level Folder Structure *

M	T	W	T	F	S	S
Page No.:						YOUVA
Date:						

⇒ backend } Always Small Letter.
⇒ frontend }

Inside frontend.

- ① > node_modules [Black hole se bhi Ghera hai 😊]
 - ② > Public (Ye woh folder hai jis m notes, favicon, logo jo public available hai koi bhi access kar sakta hai).
Imp ⇒ Google SEO k liye Important.
 - ③ > Src ⇒ This is main folder where thing were made. [eg:- Navbar, footer]
Component ⇒ [is m jo ek bar ban jata bar-bar reuse]
Pages ⇒ [is k Under Sab Page bannte hai.
[Home, Contact, About etc]]
- V.V.I. → App.js yaha se Sab Control hota hai.
Sare Pages is m Route hote hai
- Assets ⇒ Agar Images wahera hai to is m Rakhte hai.]
- ④ > gitignore ⇒ In this Very Important jo github pe upload nhi karke wo is m rakhte hai (eg. env).
 - ⑤ > .env ⇒ Important API key. avoid given to public never upload on Github!

Inside backend.

> backend.

> node-module.

> .Route. [Same Route Page & backend Code is m].

> Controller

> Server.js. [Important Sab ko Manage karti, Server Chalta hai.]

> mongoose [mongodb.Schema wali file].
 .env.

Sari Sari file js m banti hai
 ki

Agar javascript nhi aata To mere notes.
 Se Revise kar lena.

Agar Man nhi to chatgpt se Sikh lena.
 but always use your brain.
